This is a letter PP08 received from a group of schoolchildren of Comune di Alessandria, Italy, showing their love for the recent #SALUTE4CE revitalization of the area near the school Villaggio Europa.

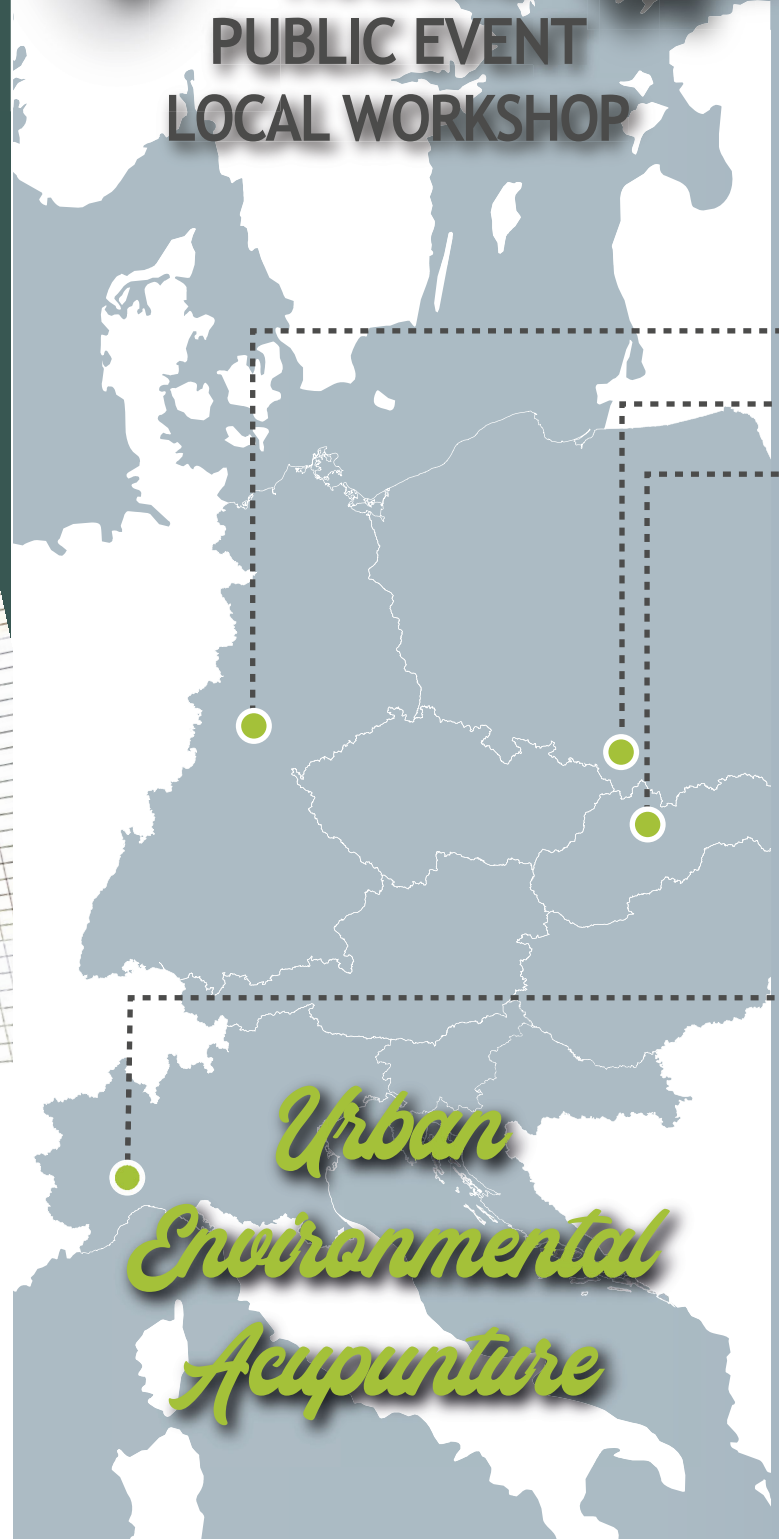

Dear Angelo [Ranzenigo, responsible of Municipal Botanical Garden, ndr],
 My classmates and I are very fond of that garden, so we decided to take care of it ourselves.
 The association we have founded will include a Sunday on and Sunday off cleaning up our beloved park.
 On that day we will have a packed lunch together and afterwards we will collect the rubbish.
 From 12 to 1 p.m.: lunch.
 From 1 p.m. to 2.30 p.m. cleaning up.
 Emma proposed to put special bins for masks.
 We invite you to come sometime.
 My greetings
 Celeste

Alessandria, 2/6/2022

Caro Angelo
 Ai miei compagni e a me quel giardino sta molto a cuore, perciò abbiamo deciso di prendercene cura in prima persona. L'associazione che abbiamo fondato comprenderà una domenica sì e una no di pulizia del nostro amato parco.
 Quel giorno pranziamo insieme con il pranzo al sacco e finito ci metteremo a raccogliere la spazzatura.
 Dalle 12 alle 13 pranzo
 Dalle 13 alle 14:30 pulizia.
 Emma ha proposto di mettere degli appa = siti cestini per le mascherine.
 La invitiamo a venire una volta o l'altra.
 I miei saluti
 Celeste Ranzenigo

**TRAINING
 PUBLIC EVENT
 LOCAL WORKSHOP**

*Urban
 Environmental
 Acupuncture*

Erfurt, DE

Great participation has been reached in the local training and public events organized by our German partners. Different stakeholders from all over the Germany took part to the virtual and physical events showing the high interest in urban green development. The project development brought also to the implementation of different green areas: an insect friendly meadow in Weimar, a municipal garden in Erfurt and a pocket park in Jena.

Chorzów, PL

Our Polish partners organized a number of events and implemented very amazing EUA interventions. A series of training sessions, public events and local workshops ensured the active participation of both stakeholders and local residents, who have been involved also in mini-games with prizes in the form of plant seedlings. A demonstration of EUA function is visible thanks to specific intervention as green wall, green street, green roadside and green backyard built across the city.

Liptovský Mikuláš, SK

The collaboration between Slovak And Czech partners brought to a large UEA concept dissemination and to the implementation of training session, living lab, local workshop and public consultation. This process was performed not only with experts, but also with the direct involvement of residents and, in particular, of kids in schools. The results are visible in the new green areas of Liptovský Mikuláš: the Grandmama Garden, the green vertical wall, the pocket park and the green inner-block.

Alessandria, IT

Also in the Italian pilot, a lot of different stakeholders were involved in public events, training sessions and local workshops with living labs. In particular, the planning and building of pilot green areas were managed directly with kids from the near schools, who also created a real association for taking care of these new urban gardens. Four sites were chosen for organizing an urban orchard, a Refuge forest, a city's green lung and diffuse greenery in the city center.
